

Step edge profile

PRO-S-1000-SI (profile 1 m)
PRO-S-2700-SI (profile 2,7 m)

Parquetvinyl
by Lamett

This step edge profile for tread insert gives new and newly restored stairs the stability they need to withstand the loads of everyday use. With their non-slip surface it provides a firm hold and significantly reduces the risk of slipping and tripping. It is well worth paying attention to quality, particularly when renovating stairways. This applies to the surfaces of step profiles in the same way as their stability. The profile is made of lightweight, hard wearing aluminium.

Available in lengths of 1 m or 2.7 m.
Supplied without screws.

TECHNICAL DETAILS:

material:	anodised aluminium
colour:	silver
profile length:	100 cm or 270 cm
dimensions:	30 mm x 5 mm

necessary for installation:
screws (25 mm) and dowels (Ø 5 mm)
